*The published fuel consumption and CO <sub>2</sub> emission figures are established according to legislated technical specifications (UNECE Regulation 101/UN Regulation 83 and SANS 20101 standards), which sets out the procedures that are used to measure the CO <sub>2</sub> emissions and fuel consumption. The claimed figures are established using specific tests under standardised, carefully controlled conditions and may differ from consumption achieved under real world conditions with the influences of altitude, road surface, geographic conditions, vehicle options, temperature, humidity, tyre size and driving behaviour amongst others. EU Unladen mass refers to a vehicle with standard equipment, with 90% fuel tank fill, including a driver (68 kg) and luggage (7 kg). Optional extras and accessories will generally increase this figure and as a result affect some of the technical figures, in specific fuel consumption and CO <sub>2</sub> emissions. Please contact your preferred authorized MINI dealer or BMW South Africa (Pty) Ltd. for information on vehicles that are available for sale, and the various specifications and options of vehicles that are available.

Thanks to the vehicle's integrated on-board diagnostics system, you will always know exactly when the next service is due and what work will be required. Condition-Based Service measures the condition of key parts subject to wear, tracks fluid levels and monitors your MINI's time- and mileage dependent service requirements. Then simply get in touch with your MINI Dealership, who will provide expert care for you and your car. Staffed by highly trained personnel, your MINI Dealership is also equipped with the latest computer-aided information and diagnostic tools. As with any maintenance agreement, there are certain exceptions which are clearly specified in the Motorplan agreement. Repairs resulting from negligence or accident damage are not covered. For all MINI models the contract distance can be extended up to 200 000 km, dependent on individual needs.
